

TC-20

THE **ULTIMATE** TOUGH CRUSHING SOLUTIONS

The TC-20 tracked crusher has the largest hopper in its class and is built for big loads and even bigger production. It is ideal for processing soft to medium hard rock, recycled concrete and recycled asphalt at rates of up to 500 TPH. The TC-20 produces a uniform, cubical product that will increase your bottom line.

TC-20

ENGINE	440-horsepower CAT® C-13 ACERT (Tier 3)
PROCESSING CAPACITY	Up to 500 TPH
STOCKPILING HEIGHT	10 feet, 11 inches
FEEDER SIZE	52 inches by 16 feet
ROTOR SIZE	40 inches by 56 inches
WEIGHT	98,500 pounds

FEATURES

- ▶ A 15-cubic-yard fixed Hardox® hopper is paired with a 52-inch by 16-foot vibrating grizzly feeder with a larger crusher inlet for increased production rates. The TC-20's feeder is the longest among tracked crushers and allows operators to feed material with a large wheel loader.
- ▶ The standard ROCK BOX is an innovative alternative to typical discharge chutes. It allows crushed material to build up and act as a wear liner, which cuts down on costly labor and wear parts.
- ▶ A 48-inch-wide discharge conveyor can stockpile up to a maximum height of 10 feet, 11 inches. Operators can hydraulically lower or raise the conveyor to feed stockpiling conveyors and make maintenance easier.
- ▶ The TC-20 includes a standard wireless remote control that offers standard full plant functions and two-speed tracking for easy maneuverability around a job site or onto a trailer.
